V040101 Study.5. Pre-election post-stratified sample weight
=====

STUDY DESCRIPTIVE:

Pre-election sample weight

NOTES:

This is a 6-digit variable with coded decimal point and

4 actual decimal places.

The 2004 NES weights are post-stratified to 2004 CPS March Supplement proportions for six (6) ages by four (4) education categories. The post-stratification adjustment is computed by dividing the CPS weighted total by the 2004 NES total weighted by the nonresponse adjusted selection weight. .

The final analysis weight is the product of the household level non-response adjustment factor, the number of eligible persons, and a person-level post-stratification factor.

TYPE:

Numeric Dec 4

=====
V040102 Study.6. Post-election post-stratified sample weight
=====

STUDY DESCRIPTIVE:

Post-election sample weight

NOTES:

This is a 6-digit variable with coded decimal point and 4 actual decimal places.

The 1,066 Post-Election cases were post-stratified to 2004 CPS March Supplement proportions for six (6) ages by four (4) education categories. The post-stratification compensates for differential non-response by age group and education level.

The panel attrition weight for the Post-Election Study is the product of the Pre-Election final weight and the post-stratification factor formed by dividing the CPS proportion by the weighted NES proportion for each of the 24 age by education cells. The weight is scaled to sum to the number of cases, 1066.

TYPE:

=====

Please look at page 2 of the booklet.

I'd like to get your feelings toward some of our political leaders and other people who are in the news these days. I'll read the name of a person and I'd like you to rate that person using something we call the feeling thermometer. Ratings between 50 degrees and 100 degrees mean that you feel favorable and warm toward the person. Ratings between 0 degrees and 50 degrees mean that you don't feel favorable toward the person and that you don't care too much for that person. You would rate the person at the 50 degree mark if you don't feel particularly warm or cold toward the person.

If we come to a person whose name you don't recognize, you

don't need to rate that person. Just tell me and we'll move on to the next one.

Some people believe the United States should solve international problems by using diplomacy and other forms of international pressure and use military force only if absolutely necessary. Suppose we put such people at "1" on this scale.

Others believe diplomacy and pressure often fail and the US must be ready to use military force. Suppose we put them at number 7.

And of course others fall in positions in-between, at points 2, 3, 4, 5, and 6.

N4. INTRO GOVT HEALTH INSURANCE SCALE
=====

Please look at page 8 of the booklet.

There is much concern about the rapid rise in medical and hospital costs.

Some people feel there should be a government insurance plan which would cover all medical and hospital expenses for everyone. Suppose these people are at one end of a scale, at point 1.

Others feel that all medical expenses should be paid by individuals through private insurance plans like Blue Cross or other company paid plans. Suppose these people are at the other end, at point 7.

And, of course, some other people have opinions somewhere in between, at points 2, 3, 4, 5, or 6.

Some people think it is important to protect the environment even if it costs some jobs or otherwise reduces our standard of living. (Suppose these people are at one end of the scale, at point number 1) Other people think that

protecting the environment is not as important as maintaining jobs and our standard of living. (Suppose these people are at the other end of the scale, at point number 7. And of course, some other people have opinions somewhere in between, at points 2, 3, 4, 5, or 6).

Recently there has been a lot of talk about women's
rights. Some people feel that women should have an equal
role with men in running business, industry, and

government.

(Suppose these people are at one end of a scale, at point 1.) Others feel that a woman's place is in the home. (Suppose these people are at the other end, at point 7.) And, of course, some other people have opinions somewhere in between, at points 2, 3, 4, 5 or 6.

V043292 Y20. INTERVIEWER CHECKPOINT- PERSONS IN HH AGE 14 OR OLDER
=====

PRE-ELECTION SURVEY:

QUESTION:

INTERVIEWER CHECKPOINT: (choose one)

VALID CODES:

-
1. Someone IN ADDITION TO RESPONDENT is age 14 or older in household
 5. NO ONE OTHER THAN RESPONDENT is age 14 or older in household
 8. Coding error by Interviewer; R indicated as married/partnered in Y2x, but coded in Y20 for R only person age 14+
 9. Coding error by Interviewer; person in household listing other than R or spouse/partner who is age 14 or older, but coded for R only person age 14+

NOTES:

Coded by interviewer for income questions: households with more than 1 person earning income are asked both family income and respondent income.

Some spouses/partners were not in the respondent's household due to residence in nursing home or due to military service etc. If R indicated married/partnered in Y2x then 1 is coded here, even if spouse/partner is not included in household listing. Code 8 corresponds to cases where IWR omitted counting a spouse/partner.

Code 9 corresponds to cases where no spouse/partner is indicated in Y2x and where household listing (see Y20x) indicated at least one other person besides R who was aged 14 or older, but interviewer miscoded Y20 to indicate that R was the only person aged 14 or older. (If however, all other persons in HH were indicated as roommates, then 1 has been coded; in all cases but 1 of code 9, however, the other persons in household were identified as family members). For cases coded 8 or 9, only R's individual income has been determined (Y21b); total household income (Y21a/Y21x) was not asked.

IS SPANISH OR HISPANIC GROUP MENTIONED AS MAIN GROUP? /
DID R MENTION HISPANIC GROUP?

VALID CODES:

0. No Hispanic mention

1. Spanish/Hispanic mention in Y24x
2. Spanish/Hispanic mention in Y26a/Y26b/Y26c/Y27a
3. Spanish/Hispanic mention in both

NOTES:

Cases where R mentioned Hispanic ethnicity in either race or ethnicity questions are coded 1-3. In 11 instances of the interviewer checkpoint, however, the interviewer coded Hispanic mention for R when none was made; these cases should have been asked Y28a but were not, so that Y28a is coded NA.

NOTES:

D1h-D1p Senate thermometers were administered in randomized order after the administration of thermometers for President Bush (D1a), Presidential candidates John Kerry and Ralph Nader (D1b, D1c), and House thermometers (D1d-g).

This variable identifies the thermometer for the 3rd-party/independent Senate candidate as administered as the nth thermometer name in the set of 6 Senate thermometers D1h-D1p.

Note: every case was assigned a randomized order for Senate Democratic candidate, Senate Republican candidate, Senate 3rd-party/independent candidate, Senator #1, Senator #2, and Senator with term not up.

If there was no Democratic candidate/Republican candidate/3rd-party or independent candidate/Senator #1/Senator#1/Senator with term not up, the order was still assigned but the relevant question was skipped in the assigned place. This represents the assigned order.

In general, House incumbents in this file have been regarded
as candidates (already) in office representing a district,
where district is regarded as a geographic rather than a
political unit, at the time of the 2004 election. The extent
of the Texas redistricting prior to the 2004 election produced
House races with incumbents running in areas where he or she
had provided little or no prior representation, thus no
Texas candidate has been identified as a true incumbent
(running or retiring) for the new districts.

NOTES:

In general, House incumbents in this file have been regarded as candidates (already) in office representing a district, where district is regarded as a geographic rather than a political unit, at the time of the 2004 election. The extent of the Texas redistricting prior to the 2004 election produced House races with incumbents running in areas where he or she had provided little or no prior representation, thus no Texas candidate has been identified as a true incumbent (running or retiring) for the new districts.

D1. INTRO POLITICAL FIGURE THERMOMETERS

=====

Please look at page 2 of the booklet.
I'd like to get your feelings toward some of our political

leaders and other people who are in the news these days.

I'll read the name of a person and I'd like you to rate that person using something we call the feeling thermometer. Ratings between 50 degrees and 100 degrees mean that you feel favorable and warm toward the person. Ratings between 0 degrees and 50 degrees mean that you don't feel favorable toward the person and that you don't care too much for that person. You would rate the person at the 50 degree mark if you don't feel particularly warm or cold toward the person.

If we come to a person whose name you don't recognize, you don't need to rate that person. Just tell me and we'll move on to the next one.

G6. INTRO INTERVENTIONISM 7-PT SCALE
=====

Please look at page 6 of the booklet.

Some people believe the United States should solve international problems by using diplomacy and other forms of international pressure and use military force only if absolutely necessary. Suppose these people are at one end of a scale, at point 1.

Others believe diplomacy and pressure often fail and the U.S. must be ready to use military force. Suppose these people are at the other end, at point 7.

And, of course, some other people have opinions somewhere in between, at points 2, 3, 4, 5, or 6.

=====

Please turn to page 11 of the booklet.
Now I have some questions about different groups in our society. I'm going to show you a seven-point scale on which the characteristics of the people in a group can be rated.

In the first statement a score of 1 means that you think almost all of the people in that group tend to be "hard-working." A score of 7 means that you think most people in the group are "lazy." A score of 4 means that you think that most people in the group are not closer to one end or the other, and of course, you may choose any number in between.

Data Completeness Report

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.
